

Ye Hbone Myat

Senior Infrastructure Engineer

CONTACTS

Bangkok, Thailand

+66 638417385

yehbone.m@gmail.com

SKILLS

- Cloud architecture (AWS, multi-cloud migration, scalable systems): Expert
- Infrastructure as Code (Terraform / Terragrunt): Expert
- Container orchestration (Kubernetes / EKS / GKE): Expert
- Continuous integration / CI/CD (GitHub Actions, Argo CD, FluxCD): Expert
- System monitoring / observability (Datadog, CloudTrail, CloudWatch): Advanced
- Network security (Cloudflare, GuardDuty, Sysdig, Vault, SOPS): Advanced
- Disaster recovery planning (RTO/RPO drills): Advanced
- Stakeholder Management & Communication (technical and non-technical audiences, enterprise clients, executive reporting, cross-regional collaboration): Advanced
- Platform Engineering: Expert
- Cost Optimization (FinOps): Expert

PROFESSIONAL SUMMARY

Senior Infrastructure Engineer with 6+ years of experience in cloud-native platforms across Southeast Asia and Japan. Proven in DevOps, cloud operations, and security, delivering 15% cost reduction and resilient systems aligned with RTO/RPO.

WORK EXPERIENCE

Omise Thailand — Bangkok, Thailand

Senior Infrastructure Engineer — Sep 2024 — Present

- Led infrastructure initiatives across multi-country projects (SEA & Japan), supporting enterprise clients (AIA, Toyota Wallet JP/PH, GMM) and ensuring scalable, secure payment systems.
- Designed and operated cloud-native platforms on AWS (EKS, RDS), improving availability and resilience for mission-critical workloads.
- Drove infrastructure improvements aligned with DevOps best practices, enhancing reliability and delivery efficiency.
- Standardized IaC using Terraform/Terragrunt and implemented GitOps with Argo CD, improving consistency and reducing configuration drift.
- Built and managed containerized platforms using Docker, Kubernetes (EKS), and Helm.
- Implemented secure secrets management (SOPS) and strengthened observability and incident response with Datadog and AWS CloudTrail.
- Enhanced security posture using Cloudflare, Sysdig, and AWS GuardDuty.
- Reduced infrastructure costs by 15% by automating non-production scale-down using AWS Step Functions and Lambda (Python).
- Executed 2 DR drills meeting RTO/RPO targets, improving system resilience and audit readiness.
- Led migration from Classic Load Balancers to ALB, improving scalability and routing flexibility.
- Delivered weekly infrastructure and security briefings to Toyota Japan stakeholders, translating technical topics into actionable insights.
- Collaborated with cross-functional and regional teams to align infrastructure solutions with business and client needs.

PropertyScout co., ltd — Bangkok, Thailand

Senior DevOps Engineer — May 2022 — Aug 2024

- Managed and optimized Kubernetes clusters across AWS, GCP, and DigitalOcean, ensuring high availability, scalability, and stable production operations.
- Designed and maintained CI/CD pipelines using GitHub Actions and FluxCD, improving deployment speed and release frequency.
- Led full infrastructure migration from DigitalOcean to AWS and GCP using Terraform with zero downtime, achieving 30% cost reduction and improved resource utilization.
- Built and operated cloud-native data and observability platforms (Metabase, Snowplow, Elasticsearch, Fluentd), improving monitoring, analytics, and system visibility.

- Implemented centralized access control and security tooling (Teleport, Vault, Cloudflare), strengthening security, auditability, and access governance.
- Developed automation for CI/CD workflows, Kubernetes jobs, and operational tasks, improving engineering efficiency and reducing manual effort.
- Enhanced system observability using Datadog, enabling proactive detection and resolution of performance issues.
- Designed secure infrastructure patterns including VPN access (Pritunl), secrets management, and encrypted messaging workflows.
- Administered relational and NoSQL databases (Postgres, MySQL, MongoDB, Redis) across multi-cloud environments.
- Authored technical documentation in Confluence and Outline, improving onboarding and cross-team knowledge sharing

8xpand technology co., ltd Singapore
System Administrator Sep 2021 — Apr 2022

Brillar co., ltd Yangon, Myanmar
Test Automation Engineer Jul 2021 — Sep 2021

Brillar co., ltd Yangon, Myanmar
Cyber Security Engineer Nov 2019 — Jun 2021

Brillar co., ltd Yangon, Myanmar
Cyber Security Intern May 2019 — Oct 2019

EDUCATION

Dec 2014 - Sep 2019

Bachelor's Degree of Communication and Network Security, University of Information Technology | Yangon, Myanmar
